## **DIVISION OF SCIENCE RESOURCES STUDIES**

The Division of Science Resources Studies ( SRS ) fulfills the legislative mandate of the National Science Foundation Act to ...

*provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies of the Federal Government...*

To carry out this mandate, SRS designs, supports, and directs periodic surveys as well as a variety of other data collections and research projects. These surveys yield the materials for SRS staff to compile, analyze, and disseminate quantitative information about domestic and international resources devoted to science, engineering, and technology.

If you have any comments or suggestions about this or any other SRS product or report, we would like to hear from you. Please direct your comments to:

# ACKNOWLEDGMENTS

*State Science and Engineering Profiles and R&D Patterns: 1997-98* was prepared by Richard J. Bennof and Steven Payson of the Research and Development Statistics Program (RDS) of the National Science Foundation's (NSF's) Division of Science Resources Studies (SRS). The report was produced under the direction of John E. Jankowski, Program Director, RDS, with guidance and review by Ron Fecso, Chief Mathematical Statistician; Mary J. Frase, Deputy Director, SRS; and Lynda Carlson, Director, SRS. Assistance was provided by Terry Ford, SRS. The text was edited by Anne Houghton, Publications Manager, SRS with assistance from Julia Harriston and Tanya Gore. Quantum Research Corporation provided a portion of the database in a special format that was required for data entry.
